Re: Antibiotics in Livestock Feed

Dear Dockets Management Branch,

I am writing to strongly urge you to BAN the use of animal feed antibiotics that are also used for humans. NO antibiotics should be used in ANY animal feed, as this reduces the efficacy of all antibiotics and encourages the growth of antibiotic resistant bacteria. But at least you can start with banning the use of antibiotics used for humans. You are charged with protecting the health of the the American Public. Please do so by banning this type of anitbiotic use as quickly as possible.

Sincerely,
Nicole Sault
